

S-02 AEPON EPOXY REDUCER

DESCRIPTION:

S-02 is a blend thinner used for reducing Aepon Epoxy. We specify a very low moisture content for the solvents we blend to make S-02 Reducer. Our moisture content specification is less than 500 PPM. S-02 assures you of a fine finish, when applying Aepon Epoxy and is used to clean up your equipment. The amount of S-02 Aepon Epoxy Reducer required will vary depending on the application equipment and the weather conditions. We recommend spraying some S-02 Reducer through your spray equipment, to flush it out, prior to spraying Aepon Epoxy. Please check with a Preservo Paint technician for a recommendation specific to your job.

USES:

Reducing Aepon Epoxy
Cleaning Equipment
Solvent Wiping

CONTAINER SIZE:

F-Style Gallon Cans
5 Gallon Cans
55 Gallon Drums
