

## **S-04 II CP-500 POLYTHANE NL REDUCER**

### **DESCRIPTION:**

S-04 II is a blend thinner used for reducing CP-500 Polythane NL. We specify a very low water content for the solvents we blend to make S-04 II reducer. Our moisture content specification is less than 500 PPM. S-04 II assures you of a fine finish, when applying CP-500 Polythane NL, no lead formulas and is used to clean up your equipment. It should not be used to spray regular formula Polythane. The amount of S-04 II Reducer required will vary depending on the product being applied, the application equipment and the weather conditions. We recommend spraying some S-04 II Reducer through your spray equipment, to flush it out, prior to spraying CP-500 Polythane NL. Please check with a Preservo Paint technician for a recommendation specific to your job.

### **USES:**

Reducing CP-500 Polythane No Lead Formula  
Cleaning Equipment  
Solvent Wiping

### **CONTAINER SIZE:**

F-Style Gallon Cans  
5 Gallon Cans  
55 Gallon Drums
