S-06 MEK REDUCER

DESCRIPTION:

S-06 is pure Methyl Ethyl Ketone thinner. It is generally used as a water scavenger and is used to clean up your equipment. The amount of MEK Reducer required will vary depending on the product being applied, the application equipment and the weather conditions. We recommend spraying some MEK Reducer through your spray equipment, when you need to clean it thoroughly. Please check with a Preservo Paint technician for a recommendation specific to your job. The federal government is considering exempting MEK in V.O.C. calculations.

USES:

Reducing VS-2005 Vinyl Strip Coat
Cleaning Equipment
Solvent Wiping

CONTAINER SIZE:

F-Style Gallon Cans
5 Gallon Cans
55 Gallon Drums
