

S-07 MINERAL SPIRITS REDUCER

DESCRIPTION:

S-07 is high quality Mineral Spirits thinner. We specify a high kauri-butanol value for our Mineral Spirits. This is a measure of the solvent power or the ability of the solvent to melt and reduce the paint. S-07 Reducer will readily mix with paint rather than sitting on the top surface. It is used for thinning and is used to clean up your equipment. The amount of S-07 Mineral Spirits Reducer required will vary depending on the product being applied, the application equipment and the weather conditions. We recommend spraying some Mineral Spirits Reducer through your spray equipment, to flush it out, prior to spraying products reduced with S-07. Please check with a Preservo Paint technician for a recommendation specific to your job.

USES:

Thinning Marine Enamel
Thinning Oil Modified Polyurethane
Cleaning Equipment
Solvent Wiping

CONTAINER SIZE:

F-Style Gallon Cans
5 Gallon Cans
55 Gallon Drums
