

S-11 URETHANE REDUCER

DESCRIPTION:

S-11 is blend thinner used to reduce MC-40 Moisture Cured Urethane. We specify a very low water content for the solvents we blend to make S-11 Urethane Reducer. Our moisture content specification is less than 500 PPM. S-11 assures you of fine finish when applying MC-40 Moisture Cured Urethane and is used to clean up your equipment. The amount of S-11 Urethane Reducer required will vary depending on the application equipment and the weather conditions. We recommend spraying some S-11 through your spray equipment, to flush it out, prior to spraying MC-40. Please check with a Preservo Paint technician for a recommendation specific to your job.

USES:

Thinning MC-40 Moisture Cured Urethane
Cleaning Equipment
Solvent Wiping

CONTAINER SIZE:

F-Style Gallon Cans
5 Gallon Cans
55 Gallon Drums
