S-13 PVC ACRYLIC REDUCER

DESCRIPTION:

S-13 is blend thinner used when coating PVC plastic with Acrylic Thermo Plastic. We specify a very low water content for the solvents we blend to make PVC Acrylic Reducer. Our moisture content specification is less than 500 PPM. S-13 assures you will achieve long term adhesion when applying Acrylic Thermo Plastic to PVC pipe or plastic and is used to clean up your equipment. The amount of S-13 PVC Acrylic Reducer required will vary depending on the product being applied, the application equipment and the weather conditions. We recommend spraying some S-13 through your spray equipment, to flush it out, prior to spraying Acrylic Thermo Plastic. Please check with a Preservo Paint technician for a recommendation specific to your job.

USES:

Thinning AC-300 For Application To PVC Or Plastic
Cleaning Equipment
Solvent Wiping

CONTAINER SIZE:

F-Style Gallon Cans
5 Gallon Cans
55 Gallon Drums
