

VINYL SEALER VS-190

DESCRIPTION:

Vinyl Sealer is excellent for sealing and waterproofing sheetrock, plaster, porous materials and wood. It can be used for sealing off water stains, graffiti marks and smoke damage. Vinyl Sealer may be used as a moisture barrier before hanging vinyl wall coverings and wallpaper.

It seals wood flooring and gym floors and can be used as a sealer for most wood such as oak, pecan, ash and maple to name a few. It leaves the wood light and natural looking and is easy to sand. Vinyl Sealer may also be tinted for use as a wood stain prior to sealing wooden floors with MC-40 or any other product which can not be used over oil based stains.
